PROFESSIONAL EXPERIENCE

Boundless Consulting | Sandton — Jan 2024 – Mar 2025
System Support

Provided technical support and system administration by installing and maintaining operating systems and applications, managing user access and resolving technical issues. Monitored system performance, maintained network connectivity and applied security updates to ensure reliable IT operations.

- **Project 1 IT Systems Administration & Support :** Installed and configured operating systems and enterprise applications, managed user accounts and permissions and provided technical support. Monitored system performance, resolved issues and maintained network connectivity to ensure reliable IT operations.
- **Project 2 System Maintenance & Security :** Applied system updates, patches and upgrades to improve security and performance. Monitored and optimized systems, proactively resolved technical issues and maintained secure, efficient IT environments.

AVO Managed Solutions | Randburg — April 2023 – Dec 2023
Web Developer Trainee

Supported the development and maintenance of websites using HTML, CSS and JavaScript. Worked with Git, VS Code and WordPress while contributing to debugging, UI improvements and project documentation.

- **Project 1 Website Development :** Assisted in building and maintaining websites using HTML,CSS and JavaScript, contributing to UI improvements and debugging to enhance website functionality and user experience.
- **Project 2 Web Tools & Collaboration :** Worked with WordPress,Git and VSCode to manage web projects, collaborate with team members, maintain version control and document development processes.
